Executive Summary

Description

Do you want to improve your agile skills and guide your team to work more effectively? The Certified ScrumMaster® Course will help you achieve this goal — through a combination of instruction and hands-on exercises.
This remote course is interactive and fun. It teaches participants how to apply the Scrum framework effectively. Led by an experienced trainer, it focuses on improving your ability to guide teams towards success with Scrum. The course covers the basics of the Scrum framework, including accountabilities, events, and artefacts. It also includes more advanced topics such as how to run great retrospectives and how to leverage the Scrum patterns, both of which will help your team towards excellence.

Who should attend the Course?
Our Certified ScrumMaster® (CSM) course is designed for:

- Beginners who are just entering the world of Agile and Scrum - this course provides a solid foundation.
- Professionals working in various roles, both within the software industry and in non-software sectors, will find valuable insights and practical knowledge to enhance their Agile and Scrum expertise.
- Established practitioners looking to formalise their experience.
- Managers and executives looking to collaborate with Scrum teams effectively will benefit from a comprehensive understanding of the Scrum framework, which is essential for effective communication and leadership within their organisations.

What are the benefits of a Certified ScrumMaster® certification?

By earning a Certified ScrumMaster® certification, you:

Learn the foundations of Scrum, practices and techniques to guide your team towards effective Scrum.

Improve your company culture by creating space for exchange and reflection

Enhance your facilitation skills and be able to coach your team

Engage with a community of recognised Scrum experts who are committed to continuous improvement and sharpening their skills.
